**These stamps are used by contractors for imprinting their firm name on walks and pavements, for advertising purposes.** Although name stamps cost a little more than plates they are much cheaper in the end, as any number of imprints can be made from one stamp, while by using name plates one or more plates should be inserted in each walk.

Our name stamps are cast in one solid piece of very hard bronze metal to which the cement will not cling, always making a perfect imprint.

Prices vary according to size and lettering.
